

The background of the slide is a dark blue field filled with a complex, abstract pattern. A human hand, with the index finger extended, points towards a bright, glowing spiral of light. This spiral is composed of many thin, overlapping lines of light in shades of blue, purple, and orange, creating a sense of depth and movement. Scattered throughout the background are numerous small, colorful dots in blue, green, yellow, and red, resembling distant stars or particles. The overall effect is one of high-tech, scientific, or digital exploration.

Open access agreements

Information for authors

Publishing your article open access (OA) can bring you several benefits, including increased downloads and citations—and make your research more accessible to readers globally.

To help you take advantage of these benefits, many institutions cover researchers' OA publishing costs (known as article processing charges, or APCs) as part of OA agreements with Springer Nature.

Upcoming author webinars

Paying for OA APCs through your institution

Publishing your article through an OA agreement is the easiest route to OA for eligible authors

Financial support for APCs

Many institutions offer financial support for researchers to pay APCs. One way is through OA agreements with publishers—either on their own or through a consortium agreement across many institutions.

Your institution's OA agreement with Springer Nature may provide:

- ✓ Full APC coverage - 100% of the APC is paid by the institution
- ✓ A percentage discount - e.g. 10% off the list price APC
- ✓ Fixed price coverage - e.g. up to €1,000 paid by the institution.

Different OA agreements include different journals

Institutions take different approaches to how they support their researchers publishing in different journals. Your institution's agreement with Springer Nature may include journals from across Springer, Nature, BMC, Palgrave, and/or Adis.

Seamlessly integrated in the publishing workflow

Getting your APC paid via an OA agreement is seamlessly integrated into the Springer Nature publishing workflows and led by you, the corresponding author. Your article will be identified as part of an agreement based on details submitted. After your article has been accepted for publication, you will be notified of your coverage options and prompted to confirm your OA licensing on behalf of all co-authors. Explore the steps in detail.

IDENTIFICATION

Eligibility for an agreement is based on the corresponding author's affiliation

After an article has been editorially accepted, the corresponding author must complete the payments and rights journey:

**if the coverage request is rejected, authors must pay for open access using other funding options.*

IDENTIFICATION

Email invite to complete identification process

Once the article is editorially accepted by the journal, the **corresponding author** receives an email invitation to complete the identification process and specify their affiliation

The corresponding author acts on behalf of all the other authors for this article. They are responsible for reviewing and accepting the terms of the publishing agreement, and for arranging any payment if required

SPRINGER NATURE

Dear Dr. Charles Darwin,

We're delighted that your article has been accepted for publication:
'The zoology of the voyage of H.M.S. Beagle'.

You now need to:

- Provide details to help us check whether your article processing charge (APC) is covered by your institution or a journal partner.
- Read and accept your publishing agreement.
- Make a payment if the APC is not covered.

If you want to publish subscription, instead of open access, there will be an option to do that in the following steps.

Continue with publishing your article:

<https://publishing-and-rights.springernature.app/workflow/123>

Kind regards,
Springer Nature Author Service

If you have any questions, please do not hesitate to contact our Author Service team at

IDENTIFICATION

Introduction page

The corresponding author sees basic information about publishing their article open access, including the list price article processing charge (APC) of the journal

Open access

Publishing open access with us (gold OA) lets you share and re-use your article immediately after publication.

The article processing charge (APC) to publish an article open access in **Journal of Research** is:

Article processing charge (excluding local taxes)

£3780.09 / \$4080.50 / €4120.89

Token code (optional)

If you have an APC token, enter it here:

Apply

Some organisations will pay some or all of your APC.

We will now check whether your APC is covered by any of our agreements.

IDENTIFICATION

Confirm institutional affiliation

The corresponding author confirms the institutional affiliation they provided during article submission

If the information displayed is incorrect, they can update it here

This affiliation information is used solely for agreement identification. It does not affect the published article

Institution or university

During manuscript submission you told us you're affiliated with the following institution:

Universiti Malaysia Sarawak
Kota Samarahan – Malaysia

Is this still correct?

☐ Yes, Universiti Malaysia Sarawak is the institution I'm affiliated with

☐ No, I've changed institution

RIGHTS

Employment check and publishing agreement

Corresponding authors need to complete their publishing agreement, also known as **license to publish (LtP)**

The document outlines the rights of the author and Springer Nature in relation to the use of the article and confirms the author's eligibility to publish their article

To generate the correct license to publish, the corresponding author selects their employment status, then clicks '**Confirm**'

Authors sign their license and can download a copy for reference, allowing them to continue with the publishing process

Agree to publish

Before we can continue with the publication of your article, we need you, the corresponding author, to provide us with permission to publish.

Some governments require a tailored publishing agreement. So we can generate the right agreement for you, tell us if either of these options apply.

Are you, as the corresponding author:

☐ An employee of the United States Federal Government

☐ An employee of the Government of the United Kingdom of Great Britain and Northern Ireland, Canada or Australia

☐ Neither of the above

i If you, or part of your author group, are employees of:

- the European Commission
- an Intergovernmental Organisation (e.g. the IMF or World Bank)

You may need an alternative agreement. Please contact us.
